

WASH ACCESSORIES

ISTOBAL
Automotive Cleaning Solutions

How to achieve **a perfect finish**

For those who wish to offer their customers a complete service for a perfect finish, inside and out, we have designed small items for the upkeep of specific areas. Vacuums, mat cleaners, paper dispensers, pressure gauges and tyre pumps. All you could possibly need for vehicles using an Istobal facility to obtain a simply perfect finish.

Those who wish to further enhance the quality of the wash and guarantee a long life to their equipment, choose Istobal cleaning and care products. We have developed a whole range of chemical products, designed for a deep-down clean without damaging the paintwork or the wash equipment. Special shampoos for prewash, mosquitos or wheelwash. Hot and high shine wax, underchassis wash, oil for lubricating equipment and consumables for demineralisers and recyclers... Everything your equipment needs.

TYRE PUMP AND GAUGE

Analogical with the option of choosing the payment system. Portable models for wall-mounting or on a stainless steel base.

PAPER DISPENSERS

Automatic, designed to optimise the finish on the vehicle's surfaces. These work with easy-to-change, pre-cut rolls.

Allies for the **final touch**

CONSUMABLES

Specially developed by the R&D Dept. to optimise the results of Istobal wash systems. Shampoos, waxes and protectants, which not only look after the vehicle body but also guarantee proper upkeep of the machines and a longer life.

MAT CLEANERS

Dry or wet clean. Two options for a perfect finish. Highly resilient stainless steel structure, an information display and an autoclean system for the best results.

PORTABLE JET WASHES

We have a wide range of small wash accessories: portable hot or cold water jet washes, hose holders, chamois wringers, filters, air hoses, etc.

A first class clean inside

VACUUMS

Powerful suction delivered by a high power vacuum pump. For one or two bays. Works with various payment systems. A highly resilient stainless steel body and theft-proof cash box.

Payment systems

Different systems available. The **mechanical** model accepts 1 coin, tokens or a switch, while the **electronic** system accepts various coins, and proximity or chip cards, and allows connection to a computer to process and log operations.

Mechanical system

Electronic proximity card system

Electronic chip card system

Electronic three coins + token n° 1 system
